## RG25

high power relays

## HIGH BREAKING

CAPACITY: AC1-10 KVA

- General purpose relays, designed for continuous operation* $\cdot A C$ and DC coils, insulation class F: $155{ }^{\circ} \mathrm{C} \cdot$ High breaking capacity: AC1-10 kVA
- 35 mm rail mount acc. to EN 60715 - High insulation dielectric strength
- Applications: control of electromagnets; systems of heating, cooling, ventillation, air conditioning; control with single-phase motors; catering industry machines and equipment; automation systems; photoelectric systems; etc.
- Recognitions, certifications, directives: RoHS, ( $\in$ FH[ UK

## PRECAUTIONS:

1. Ensure that the parameters of the product described in its specification provide a safety margin for the appropriate operation of the device or system and never use the product in circumstances which exceed the parameters of the product. 2. Never touch any live parts of the device. 3. Ensure that the product has been connected correctly. An incorrect connection may cause malfunction, excessive heating or risk of fire. 4. In case of any risk of any serious material loss or death or injuries of humans or animals, the devices or systems shall be designed so to equip them with double safety system to guarantee their reliable operation.

## Mounting

Relays RG25 are designed for direct mounting on 35 mm rail mount acc. to EN 60715. Operational position - coil terminals downwards. Connections: max. cross section of the cables: $2 \times 2,5 \mathrm{~mm}^{2}(2 \times 14$ AWG), stripping length: 9 mm , max. tightening moment for the terminal: $0,7 \mathrm{Nm}$.
