

Automation is our passion

More than 60 years of experience

Polish manufacturer
of relays

We have been active in the market of industrial automation for more than 60 years, and virtually everything has changed since. Owing to our employees' involvement and development in each area of our activities, we changed a small home-market enterprise into a company which sell their products worldwide.

We introduced the whole range of new products into our production. We changed the image of the company, machines, technology, management system and many other things. We have been constantly acquiring experience, we won an opinion of a responsible, reliable and stable company, which made it possible for us to establish cooperation with demanding clients known worldwide.

Recently, we have been facing a rapid development period, i.e. extension of the plant's infrastructure – construction of a new production hall, opening of new development projects in cooperation with the National Center for Research and Development; we also won numerous awards and prizes, e.g. MADE IN POLAND 2021, Polish Innovation Award 2021, Commercial Award of Lubuskie Province Marshall 2021, 1st place in the contest Safe Work Organizer, safety Laurel 2021 Securitas Laboris Supreme Lex Esto, for safe and employee-friendly workplaces.

Covering such a long way and acquisition of huge experience as a company enables us to meet expectations of every client, and to look into the future with optimism.

Management Relpol S.A.

Who we are

Relpol S.A.

Is the **largest Polish manufacturer** of electromagnetic relays. It is a company with long tradition and huge experience – with Polish capital; a company whose shares are listed at the Warsaw Stock Exchange.

Although the company used to change its name through the period of its existence, since 1958 we have always specialized in production of highest quality relays.

For more than 60 years now, we have been developing in order to meet high expectations of our clients. We pay particular attention to research and development. Not only do our investment projects improve quality and increase production capacity, but they also positively affect the natural environment.

We permanently work on modernizing the production process and so our products are purchased by customers all over the world.

Annual revenue

30 million
of nearly **EURO**

Values

Research

- we are looking for new opportunities and innovative solutions, we cooperate with universities and NCBR.

Education

- we care about developing our skills.

Leader

- we set the standards for code of conduct.

Research
Education
Leadership

Product
Operation
Loyalty

Product

- we provide customers with the best products and services, provide support, share knowledge and experience.

Operation

- we respect our customers, shareholders, competitors, the environment and local communities.

Loyalty

- we show mutual respect, tolerance, honesty and loyalty to each other.

Our strength

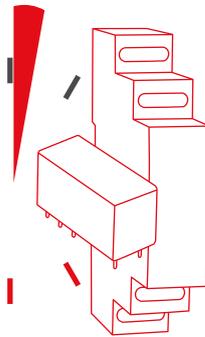

Experience

- more than 60 years of specializing in production of relays,
- experienced and specialized staff,
- long-term business relations.

Flexibility

- planning of deliveries: forecasting system for key partners,
- management of client's store,
- special versions of relays according to client's needs,
- short production series: minimum-quantity orders.

We manufacture
1 every
second
one relay

Production possibilities

- our own projects and research laboratory,
- production of our own tools and details (plastic and metal parts),
- most modern machines,
- capability of 3-shift operation, 7/24 (seven days a week).

Quality

The complete process of designing and modernization of our products, our own technical, construction and research facilities, modern machines and automated production.

Qualified suppliers of raw materials verified in accordance with legal requirements, CMRT, CRT, Reach and RoHS declarations.

Production free of harmful substances, compliant with Conflict Minerals policy.

Modern production profile and high quality products:

– certificates ISO 9001:2015, ISO 14001:2015, ISO 50001:2018,

– Policy of Integrated System of Quality, environment and energy Management (Pb and Cd) and complying with the principle of social responsibility known as Conflict Minerals assumed in the industry,

– all the products comply with the required norms and standards: RoHS, VDE, UL, CSA, EAC, UKCA, LR, IK, UCSM, CE, AUCOTEAM GmbH, BBJ,

– very high level of production process control: **100% of the products are tested** within the frame of production process,

– post warranty service,

– own research laboratory.

Products

Nearly
4000
products
in the offer

interface relays

relays for railroad industry

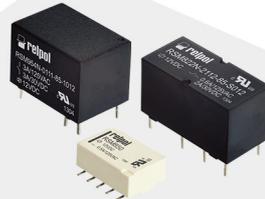

miniature relays

industrial relays

plug-in sockets for relays

subminiature relays

high power relays
for photovoltaic systems

programmable relays

installation relays

bistable - impulse relays

time relays

monitoring relays

signal lamps

solid state relays

installation contactors

power supplies

overvoltage arresters

EV charging stations

Applications

Electronics

Industrial automation

Railroad industry

Building automation

Where can you find our products?

Power industry

Solar inverters and EV charging stations

Lighting control

Ventilation, air conditioning, refrigeration and heating systems

Development

Projects B&R 2021-2023

The largest projects dedicated to the key sectors implemented by RELPOL:

– **reduction of energy consumption:**

new bistable - impulse relays, project with NCBR of the value of PLN 31.6 mio, co-financing PLN 12.7 mio.

– **safety improvement:**

new industrial relays of higher reliability for critical infrastructure, project with NCBR of the value of PLN 7.7 mio, co-financing PLN 3.6 mio.

– **quality and production potential enhancement:**

construction of production-storage hall with social facilities and necessary infrastructure, cost of the works is about PLN 9 mio.

DEVELOPMENT CONCEPT FOR ... S.A.

Staff

The base of our organization is formed by **skilled specialists** with long experience, which allows us to remain a reliable partner in business and recognizable, strong European brand of RELPOL.

We **employ 700 people** at our two production sites. 600 of them are production workers. The remaining employees are administrative staff, of which 50% are senior technical staff (R&D, designers, technologists).
